

DigiTransact Mastermind

Smart practice for every Ghanaian learner — KG to University

Give every learner in your school unlimited, curriculum-aligned practice.

DigiTransact Mastermind is an adaptive learning platform built for Ghana's curriculum. Students practise thousands of skill-based questions, earn mastery scores, and prepare confidently for BECE and WASSCE — while teachers track progress from a simple dashboard.

Dedicated exam preparation

What your school gets

Teacher dashboards

See exactly which skills each class has mastered, who needs help, and how practice is trending — no marking required.

Homework assignments

Assign any skill to a class with an optional due date. The platform marks everything automatically and shows completion at a glance.

Printable class reports

One-click, print-ready progress reports for staff meetings, PTA sessions and terminal report support.

Simple join codes

No IT department needed. Teachers join with your school code; students join their class with a class code. Set-up takes minutes.

Full premium for everyone

Every enrolled student gets unlimited practice, the AI Tutor, Writing Coach, and BECE/WASSCE exam prep — all included in one school plan.

Motivation built in

SmartScore mastery, badges, streaks and leaderboards keep learners coming back. Voice controls and picture maths support the youngest pupils.

Getting started is easy — and affordable.

How it works — 4 simple steps

1

Register your school online

Visit the Schools page, enter your school's name and region, and receive your unique teacher code instantly.

2

Enjoy a 30-day free trial

Your whole school gets full premium access free for 30 days — no payment details required to start.

3

Teachers and students join with codes

Teachers join using the school code and create classes. Each class gets its own join code for students. Teachers are always free.

4

Pay per term with Mobile Money

When the trial ends, pay once per term (about 4 months) for the number of student seats you need — via MTN MoMo, Telecel Cash or AT Money.

Termly pricing per student

School size	Price per student per term
Up to 50 students	GH¢15
51 to 200 students	GH¢12
More than 200 students	GH¢10

One term = 120 days of access. Minimum of 5 student seats. Teachers and school administrators are always free of charge.

Example: a school with 100 students pays $100 \times \text{GH¢}12 = \text{GH¢}1,200$ per term — full premium access for every student, plus dashboards, homework and reports for all your teachers.

Start free — decide later

Every new school begins with a 30-day free trial covering up to 500 students. Explore everything with your staff and pupils before paying a single cedi.

Register your school today

Go to digitransactmastermindseries.abacusai.app/schools and click "Register your school".
